# Idea

## Company Internal Cafe System

The Company Internal Cafe System is designed to facilitate employee coffee orders within the workplace.

Employees can conveniently request beverages from their workstations using the company-provided computers.

This system streamlines the process, allowing employees to order drinks without leaving their desks, enhancing workplace efficiency and satisfaction.

```

The image shows a login form for 'Internal Cafe' overlaid on a background of chocolate truffles. The form is white with rounded corners. At the top center is a brown crown icon with the text 'Internal Cafe' below it. There are two input fields: the first contains '201901' and the second contains '010-1234-1234'. Below the fields is a black button with the text 'Find-PW' in white.
